Marci,

Attached is an item list of research materials from P.I. Adam Martiny for export review prior to shipping to the U.K. in early September.

Risk services reviewed the liquids as noted below.

Also included is the research vessels itinerary near the bottom of this email.

Let me know if any further information is needed prior to your approval.

Hi Dan,

Below is the travel itinerary for the RRS James Clark Ross. Myself, our lab tech, and the equipment will be joining the ship in Harwich on September 20, 2018. The ship is stopping in Portsmouth on the 24th, but we will be staying on the ship. Then we are disembarking in the Falkland Islands on October 30th. However, the outstanding question is whether we can bring our equipment back with us to the UK at that point, or whether it has to stay on the ship until it returns to the UK on June 24th, 2019. Apparently the fellows who can answer that question are out of the office until next Tuesday. Sorry I don't have the full answer for you yet!

Best,

Alyse
